

Vidyo®

VidyoConnect™ Meeting Room Experience

High performance group collaboration for most meeting spaces

Use Cases

Team meetings

A comfortable space for teams to meet regularly in person and over video to discuss goals and deadlines

Customer presentations

An HD video and audio-enabled professional space where employees can meet with customers and present content

Project review sessions

Teams can leverage dual monitors in a large meeting space to share content and review project plans

Benefits

Ultra-HD experience

Receive up to 4K video and content

Customizable Layouts

Flexible content and participant video layouts with screen configurations supporting up to 16 viewable participants

Collaborate with ease

Multipoint content sharing allows users to toggle to switch between shares from multiple participants

Click-to-join meetings

Calendar integration for single-tap meeting access

Single and dual screen support

Leverage two HD monitors for content share and participant video

Business Challenge

Today's workplace requires high quality video group collaboration to maintain a competitive edge. High quality video collaboration was cost prohibitive to deploy for broader use, forcing enterprises to choose between high quality for a few, or low quality for the masses. Enterprises require group video conferencing systems that deliver crystal clear quality that can be broadly deployed for maximum effect.

Vidyo Solution

The VidyoConnect Meeting Room Experience is for enterprise organizations who need an exceptional video room system that will transform their mid-size conference space into a smart hub and want the ability to meet with their team face-to-face and share content regardless of their physical location.

This true cross-platform solution makes it possible for users to meet with participants from every kind of endpoint, including room systems, desktops, laptops, tablets, and mobile devices.

The VidyoConnect Meeting Room Experience is available as a purpose-built turn-key appliance, or as installable software that can run on off-the-shelf hardware. It delivers incredible 4K ultra HD video resolution without sacrificing quality from remote participants or their content. Unlike other video conferencing solutions, The VidyoConnect Meeting Room Experience can be deployed in virtually any space and offers flexible configurations to fit your company's specific needs.

“Vidyo is just as good as being at the same table. We can present maps, spreadsheets and drawings, and zoom in on design details without losing clarity and crispness of the images.”

-Institute of Marine Research
